AIONX — LIVE & OPERATIONAL

intelligence@aliyarsolutions.com · aliyarsolutions.com · 2025

THE PROBLEM WE SOLVE

Your organisation is bleeding intelligence every single day.

Not because your people aren't smart. Because no system captures what they know, amplifies what they decide, or prevents what they repeat.

Decisions Made Blind

Leaders make million-dollar calls on 40% of available information. The rest is buried in inboxes, lost in handover notes, or simply never captured.

The Same Mistakes, Again

Failed campaigns, lost clients, and operational disasters repeat because no system catalogues what went wrong and why.

Institutional Memory Dies

When your best performer leaves, three years of institutional knowledge leaves with them. Every new hire restarts from zero.

Strategy Disconnected

By the time quarterly plans reach the ground, the market has moved. There is no live feedback loop connecting strategy to execution.

Client Churn Blindspot

You find out a client is leaving when they send the cancellation email. No early warning. No pattern detection. Just avoidable loss.

Siloed Tools

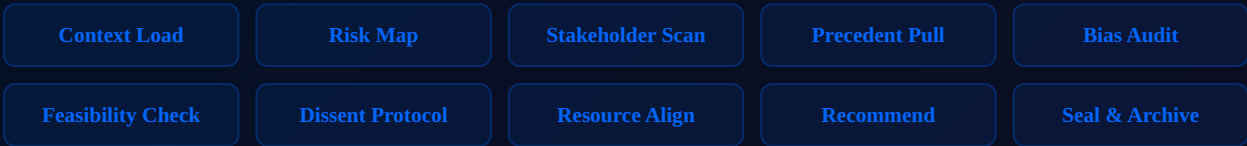

CRM here. Finance in a spreadsheet. Knowledge in someone's head. These silos cost co-ordination — the most expensive gap your organisation has.

Three capabilities no software on Earth offers.

FLAGSHIP 01

The Grand Convergence Council

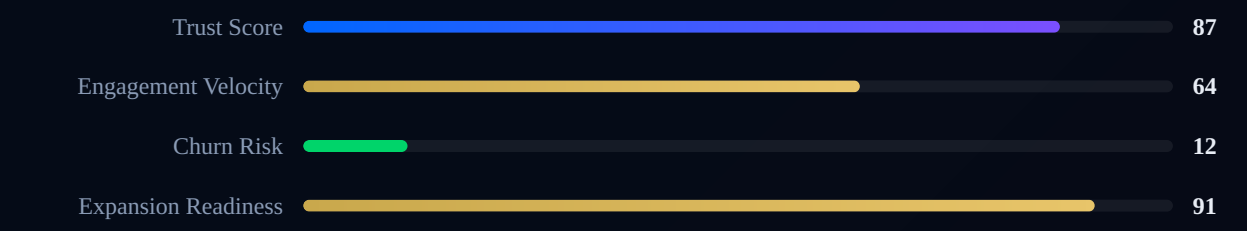

A ten-phase deliberation architecture that assembles every relevant voice, every risk flag, every historical precedent — and forces a result that is defensible and irreversible. Twelve specialist intelligences convene. Each phase eliminates a different category of bias. Nothing proceeds until the system certifies completeness.

FLAGSHIP 02

Client Digital Twin

A live predictive behavioural model of every single client relationship — tracking sentiment, engagement velocity, satisfaction drift, and churn trajectory in real time. You know, before your client knows themselves, when the relationship is at risk and exactly what they need to hear.

FLAGSHIP 03

Institutional Wisdom Index

For the first time in business history, your organisation has a score — from 0 to 1000. Measuring decision quality, learning velocity, client trust, operational efficiency, and leadership authority as a single, trackable number. Watch your organisation get smarter every week.

Wisdom Score

Every capability your organisation needs.

Deploy individual systems or combine them into the full AIONX Intelligence Stack. Every module operates as a sovereign system and amplifies every other.

DIVISION I — FOUNDATION INTELLIGENCE

Intelligence Core Activation

A central intelligence layer captures, structures, and makes every critical insight available to every decision — instantly.

Foundation

Real-Time Situation Awareness

A live command picture across all departments feeds leadership with real-time status, anomalies, and opportunity signals continuously.

Foundation

Institutional Memory Engine

Every decision, outcome, and lesson is captured, structured, and permanently accessible — regardless of who comes or goes.

Foundation

DIVISION II — DECISION ARCHITECTURE

Grand Convergence Council

Ten-phase deliberation architecture certifying every major decision as complete, defensible, and irreversible.

Flagship

Decision Quality Index

Every decision scored against 14 quality dimensions — creating a trackable, improvable standard across your organisation.

Decision Layer

Risk Intelligence Shield

Predictive risk modelling identifies threats 60–90 days before they impact operations — giving leadership time to neutralise, not react.

Decision Layer

DIVISION III — CLIENT INTELLIGENCE

Client Digital Twin

Live predictive behavioural model of every client — tracking trust, satisfaction, expansion readiness, and churn probability in real time.

Flagship

Churn Prevention System

Churn signals detected 60–90 days before they become decisions — triggering intelligent retention protocols proactively.

Client Layer

Relationship Health Monitor

Trust tracked as a live continuous metric across every interaction, deliverable, and touchpoint — with automated alerts on dips.

Client Layer

DIVISION IV — OPERATIONAL EXCELLENCE

Mission Command System

Every strategic initiative managed as a military-grade mission with commander assignments, milestone gates, and automated escalation on deviation.

Operations

Performance Accountability Engine

Every commitment tracked with automated accountability loops and performance telemetry — creating a culture of execution.

Operations

Workflow Intelligence Layer

Bottleneck analysis continuously identifies failures and auto-recommends corrections before productivity suffers.

Operations

DIVISION V — ORGANISATIONAL LEARNING

Institutional Wisdom Index

A master intelligence score 0–1000 — measuring decision quality, learning velocity, client trust, and leadership authority.

Flagship

Autopsy Intelligence

Every failure dissected across 8 root-cause dimensions, findings embedded into future decision protocols permanently.

Learning Engine

Counterfactual Learning Engine

Counterfactual modelling reconstructs alternative decision paths — making your future smarter than your past.

Learning Engine

DIVISION VI — GROWTH INTELLIGENCE

Intelligent Lead Qualification

Every lead scored across 22 behavioural, contextual, and intent dimensions — focus exclusively on opportunities that convert.

Growth Layer

Outreach Intelligence System

Timing, channel, and personalisation systems ensure outreach lands when recipients are most receptive — maximising response.

Growth Layer

Proposal Intelligence Engine

AI-guided proposals adapt positioning, evidence, and pricing to each prospect's psychology and decision criteria.

Growth Layer

DIVISION VII — COMMAND & SOVEREIGNTY

Captain Intelligence Dashboard

Real-time command-centre view: live operational telemetry, predictive signals, decision queues, and priority alerts.

Command Layer

Authority Calibration System

Decision authority dynamically calibrated to demonstrated track record — ensuring the most capable voice governs every category.

Command Layer

Voice Intelligence Briefing

Personalised audio intelligence briefing delivered to leadership — synthesising priorities and risk alerts in 90 seconds.

Command Layer

HIA Certification Programme

Formal validation of your organisation's operational intelligence tier — from foundational (Tier 0) to sovereign-grade (Tier 4).

Certification

From chaos to command in four deliberate phases.

01

Intelligence Audit

Deep diagnostic of your decision architecture, knowledge gaps, client intelligence blindspots, and operational failure patterns. No assumptions. Full clarity.

02

System Architecture

We design your bespoke AIONX stack — selecting the specific intelligence modules, integration points, and escalation protocols that match your exact profile.

03

Live Activation

Your systems go live with zero disruption. Intelligence begins flowing immediately. Your Institutional Wisdom Index receives its baseline reading.

04

Continuous Evolution

AIONX learns continuously. Every decision, outcome, and interaction makes the system more precise. Your organisation compounds intelligence.

CLIENT TRANSFORMATIONS

They didn't need more staff. They needed intelligence.

NATIONAL HEALTHCARE NETWORK · UNITED KINGDOM

"We were losing the right patients because we couldn't see which ones needed us most."

A regional healthcare provider managing fourteen clinics was haemorrhaging patients — not from poor care, but from poor co-ordination. Referrals fell through cracks. High-risk patients were identified too late. After deploying AIONX's Client Digital Twin and Mission Command System, patient journey gaps became visible for the first time. Automated care pathway monitoring flagged at-risk patients an average of 47 days earlier. Referral completion rates climbed from 61% to 94%.

"I've been in clinical leadership for twenty-two years. I have never seen an operational transformation this fast, this clean, or this undeniable."

— Medical Director, Regional Health Network (UK)

INTERNATIONAL LAW FIRM · 60 PARTNERS

"Our partners were making case strategy decisions with no visibility into what had worked before."

A sixty-partner law firm had collective knowledge trapped inside the minds of senior partners — and those partners were leaving. Every new case started from scratch. After deploying the Grand Convergence Council and Autopsy Intelligence Engine, eleven years of case outcomes were catalogued. Junior partner decision confidence increased 71%. Win rates on contested matters improved 38%.

"We always said our greatest asset was our people's expertise. AIONX made that expertise portable, searchable, and permanent."

— Managing Partner, International Dispute Resolution Practice

UNIVERSITY SYSTEM · 28,000 STUDENTS

"We were graduating students without any intelligence on what was actually driving their success."

A university system with 28,000 enrolled students had no coherent model of what predicted student success — or failure. The AIONX Education Intelligence Platform built predictive models for every enrolled student, identifying disengagement signals six weeks before academic performance declined visibly. Dropout rates fell 44% in the first academic year.

Revenue Protected

"We stopped reacting to failure and started preventing it. AIONX gave us intelligence we didn't know we were missing."

— Vice-Chancellor, Academic Affairs

PRIVATE EQUITY PORTFOLIO · 6 COMPANIES, 3 CONTINENTS

"Our board was making acquisition decisions on data that was three months old."

A private equity-backed holding company managed six portfolio businesses. Board-level decision making was chronically delayed. When the Grand Convergence Council was deployed for their next acquisition deliberation, the process that previously took eleven weeks completed in eighteen days — with higher confidence ratings and a formal audit trail for every recommendation.

Board Confidence

"The time we used to spend hunting for information, we now spend using it. That's the real competitive advantage."

— Chief Operating Officer, Multi-Sector Portfolio Group

GLOBAL TECHNOLOGY CONSULTANCY · 380 EMPLOYEES

"We lost three anchor clients in one quarter. No one saw it coming. Everyone should have."

A technology consultancy lost \$4.2M in ARR across one quarter — three enterprise clients who had shown every sign of departure that no system was designed to detect. After deploying AIONX's Client Digital Twin and Churn Prevention System, zero enterprise clients churned in the following eighteen months. NPS climbed from 41 to 73.

0	73	\$4.2M	89%
Enterprise Churns (18mo)	NPS (from 41)	Risk Eliminated	Recovery Rate

"We knew our clients were unhappy before they did. That is an extraordinary capability. And it saved our business."

— Chief Revenue Officer, Global Technology Consultancy

THE INTELLIGENCE ARCHITECTS

Nine specialists. One singular obsession.

We didn't build AIONX from a template. Every member of this team has spent years inside failing organisations watching the same preventable problems repeat — and decided to do something permanent about it.

AS

Dr. Aliyar S.

Chief Intelligence Architect

Designed AIONX's core deliberation protocol after a decade in organisational failure analysis.

ZK

Zahra Khalil

Director of Client Intelligence

Built predictive client models for Fortune 500 companies. Specialises in trust architecture.

RM

Rafael Montoya

Head of Decision Architecture

Former military intelligence officer. Designed the Grand Convergence Council protocol.

NP

Nadia Petrov

Institutional Learning Lead

PhD in organisational cognition. Designed the Autopsy and Counterfactual frameworks.

JO

James Okafor

Healthcare Intelligence Specialist

Clinical operations consultant. Transformed patient intelligence for NHS trusts and networks.

LW

Linh Wei

Financial Intelligence Architect

Former quantitative analyst at a sovereign wealth fund. Designed AIONX financial risk models.

SR

Sophie Reinhart

Education Systems Lead

Eight years as university transformation director. Designed the Education Intelligence Platform.

DH

Darius Howell

Operational Command Lead

Aerospace operations and supply chain intelligence. Designed Mission Command System.

PA

Priya Anand

Legal Intelligence Specialist

Former litigation strategist. Built precedent intelligence systems for law firms globally.

WHAT GETS MEASURED GETS MASTERED

Your organisation's intelligence score is waiting to be calculated.

Your current Institutional Wisdom Index

The average untransformed organisation scores 180–340. AIONX clients average 680 after 12 months. Elite-tier clients exceed 850. Where does your organisation stand?

Decision Quality
